The purpose of this book is to reorient the current agenda in education towards learning. The recent emphasis has been on achieving standards through managing schools, teachers and the teaching process. But the real purpose of schools was, is, and always will be about learning. In an increasingly complex, diverse and unpredictable world, it is necessary for schools and those working with them to refocus on learning at all levels - pupils, teachers, leaders, the organisation as a whole and all of the school’s partners.

It’s About Learning is an accessibly written discussion woven with practical examples and strategies. It also includes an annotated bibliography suggesting useful follow up reading, and the issues will be posed as questions for reflection and discussion.
